<u>Feedback on the Virtual Internship:</u>

Hi, I'm **Naresh D**, from the **Department of Artificial Intelligence and Data Science at M. Kumarasamy College of Engineering**.

I recently attended an **IBM Edunet Foundation session** on *Artificial Intelligence and Retrieval-Augmented Generation (RAG)*, and it was a truly eye-opening experience. The session was clear, well-structured, and made complex concepts very easy to understand. What I really liked was the **hands-on approach** — exploring real-world applications helped me connect theory with practice and gave me fresh ideas for my own projects.

I'm really thankful to the **IBM Edunet Foundation** team for organizing such meaningful sessions. It has motivated me to learn more and keep exploring the exciting world of AI.
